ABOUT THE COMPANY

Compsoft Technologies (CST) is a digital service provider that aims to provide software, designing and marketing solutions to individuals and businesses. At CST, we believe that service and quality is the key to success

We provide all kinds of technological and designing solutions from Billing Software to Web Designs or any custom demand that you may have. Experience the service like none other! Some of our services include: Development - We develop responsive, functional and super-fast websites. We keep User Experience in mind while creating websites. A website should load quickly and should be accessible even on a small view-port and slow internet connection.

Mobile Application - We offer a wide range of professional Android, iOS & Hybrid app development services for our global clients, from a start up to a large enterprise.

Design - We offer professional Graphic design, Brochure design & Logo design. We are experts in crafting visual content to convey the right message to the customers.

Consultancy - We are here to provide you with expert advice on your design and development requirement.

Table of Contents

OVERVIEW OF THE PROJECT

Project Name: Custom Resume Generator

Team Members: NAME 1: Aashish Pandey

NAME 2: Himanshu Singh

NAME 3: Siddhant Kumar Sachin

NAME 4: Devashish Choudhary

This project is based on Web Development and its Applications. The main objective of this project is   to learn the implementation of HTML, CSS and JavaScript at frontend and PHP, MySQL database at backend, The webpage of this project is created using HTML and styling of the webpage is done using CSS.

It is a web application that simplifies the task of storing a users results . The system is flexible to be used and reduces the need of frequently searching and accessing an individuals marks. The system is developed to provide an easy means for storing semester wise results. Individuals have to login and enter their marks in a form.They can then access the result and print it in a PDF format.

CUSTOM RESUME GENERATOR

Resume is the first meeting between you and a prospective employer more often now than ever. Companies do not have the time to interview every applicant that is interested in the job. They used an eliminating process. That's right – Resume! When a job seeker wants to apply for a job online then generally he/she needs to attach his/her resume with the email. Custom Resume generator provides the users the popular resume formats and a better way to show their resumes to the employers. The user can login by using username and password. If the user isn't registered then the user can sign up by clicking the signup button. Customers can customize their resume with their choice of themes and details. The services are hard to be defeated by the competitors as the system is providing the customers exactly what they want.

GOALS

➢ Planned approach towards working

➢ Accuracy

➢ Reliability

➢ No redundancy

➢ Immediate retrieval of information

➢ Immediate storage of information

➢Easy to operate

How can I create my resume?

• The user can login by using username and password.

• If the user isn't registered then the user can sign up by clicking the signup button.

• Click on the Login button to get started with our online resume maker.

• Now feed your information into the blank fields in the standard template. There are different sections in every resume template that are to be covered including Contact Details, Work Experience, Skills, and Education, Projects, Achievements.

• Fill each detail correctly and clearly. Remember, don't ever lie on your resume. Lying in a resume in any manner can cost you later.

• Now you have filled the details, it's time to download the resume. You have the option to download it in pdf format anytime and anywhere. The resume is saved automatically in your account.

• That's it! A professional resume is created in a matter of minutes. Now you are a step closer to your dream job with a perfectly designed resume.

TOOLS USED

Software Requirements

• Text editor (VS code recommended)

• Front End: HTML, CSS, JS , React.

• Back End: is created using node.js

• Linux 7.1 or Windows XP/7/8/10 OS or Mac OS

• Database is created by MYSQL Hardware Requirements

• Pentium 200-MHz computer with a minimum of 64 MB of

• RAM (128 MB OF RAM recommended)
